AARAV PATEL

Availability January – July 2027 | Software Engineer | Boston, MA
(341) 899-8706 | patel.aaravm@northeastern.edu | LinkedIn | GitHub

EDUCATION

Northeastern University | Boston, MA GPA: 3.48/4.00

B.S. in Computer Science and Business Administration *Expected May 2029*

- **Coursework:** Algorithms & Data Structures, Databases, Program Design and Implementation I & II, Discrete Structures
- **Activities:** Aperture: Photography Club (Treasurer), Ecce Performing Arts Club (Pianist), Junoon South Asian Club (DJ)
- **Interests:** Photography, Music Production, Strength Training, Cricket, Aviation, Wildlife, Hiking

EXPERIENCE

Nice Software Solutions **Nagpur, India**

AI Automation Intern *July – August 2026*

- Automated client data intake by shipping 3 LLM chatbots, building Python backends and document-extraction pipelines
- Enabled real-time itinerary generation by building an AI travel agent on Google ADK with the DuckDuckGo search API
- Co-built a multi-agent inventory procurement backend for an international client, parsing documents into queryable data

Residential Security Office **Oakland, CA**

RSO Oakland Proctor *January – May 2026*

- Streamlined incident escalation by coordinating handoffs with the Department of Public Safety and Residential Life
- Maintained audit-ready security records by logging guest and visitor entries in the residence hall access-control system
- Resolved real-time safety incidents by applying University protocol and independent judgment to on-the-spot decisions

Immverse AI **Nagpur, India**

AI Engineer Intern *June – August 2025*

- Fine-tuned IGCSE-GPT via LLaMA-Factory for exam prep, adding structured prompting and syllabus-based evaluation sets
- Improved answer relevance for 50 active students by running syllabus-aligned evaluations and refining fine-tuning data
- Iterated on prompt design, data-formatting pipelines, and evaluation loops to align outputs with IGCSE student needs

PROJECTS

SightScreen – Live Cricket Win-Probability Platform | GitHub | Live August 2026

- Built a full-stack live cricket win-probability platform (Next.js, FastAPI, LightGBM) on 3.8M deliveries, 13,000+ matches
- Trained a LightGBM model to a 0.1232 Brier score on holdout matches, beating base rates by 0.0386 via clustered bootstrap
- Deployed on Vercel, Railway, and Supabase (PostgreSQL) for ~$5/month, resolving IPv6-only database access with poolers

BCG GenAI – AI Chatbot Development Job Simulation (Forage) **September 2026**

- Extracted and cleaned financial data from 10-K/10-Q SEC filings with Python and pandas to support financial analysis
- Built a rule-based Python NLP chatbot that queries financial filings, surfacing key metrics in plain-language answers
- Analyzed trends across income statements and balance sheets to inform data-driven, AI-assisted consulting recommendations

Wanderdex – AI-Powered Pixel-Art Travel Passport | GitHub | Live **October 2026**

- Built a full-stack travel-logging app (Next.js, TypeScript, Supabase) with 3 inputs: map links, AI-parsed text, photo GPS
- Secured a shared Postgres DB with Row Level Security and HMAC-SHA256 signed lookups, fixing an over-permissive grant
- Held Google API costs at $0/month via per-user rate limits and a 4,500-call monthly cap, backed by 600+ Vitest unit tests

SKILLS & TECHNOLOGIES

- **Languages:** Python, Java, JavaScript, TypeScript, SQL, MySQL, HTML/CSS
- **Frameworks & Tools:** React, Next.js, Node.js, FastAPI, Tailwind CSS, pandas, NumPy, Vitest, Git, Figma
- **Data & Cloud:** PostgreSQL, Supabase, Docker, GitHub Actions (CI/CD), Vercel, Railway
- **AI/ML:** LightGBM, LLaMA-Factory, LangChain, CrewAI, Google ADK, LLM Evaluation, Prompt Engineering
